

## Report

The problem I tried to solve was to have three in one app. In my personal and a few of my friend's experiences we had to use three different apps to do the following:

1. Notes/Tasks app: Keeps track of upcoming assignments and exams
2. Calendar: A visual representation of (1) and a list of classes that you have for the day
3. Grades app: Keeps track of your grades

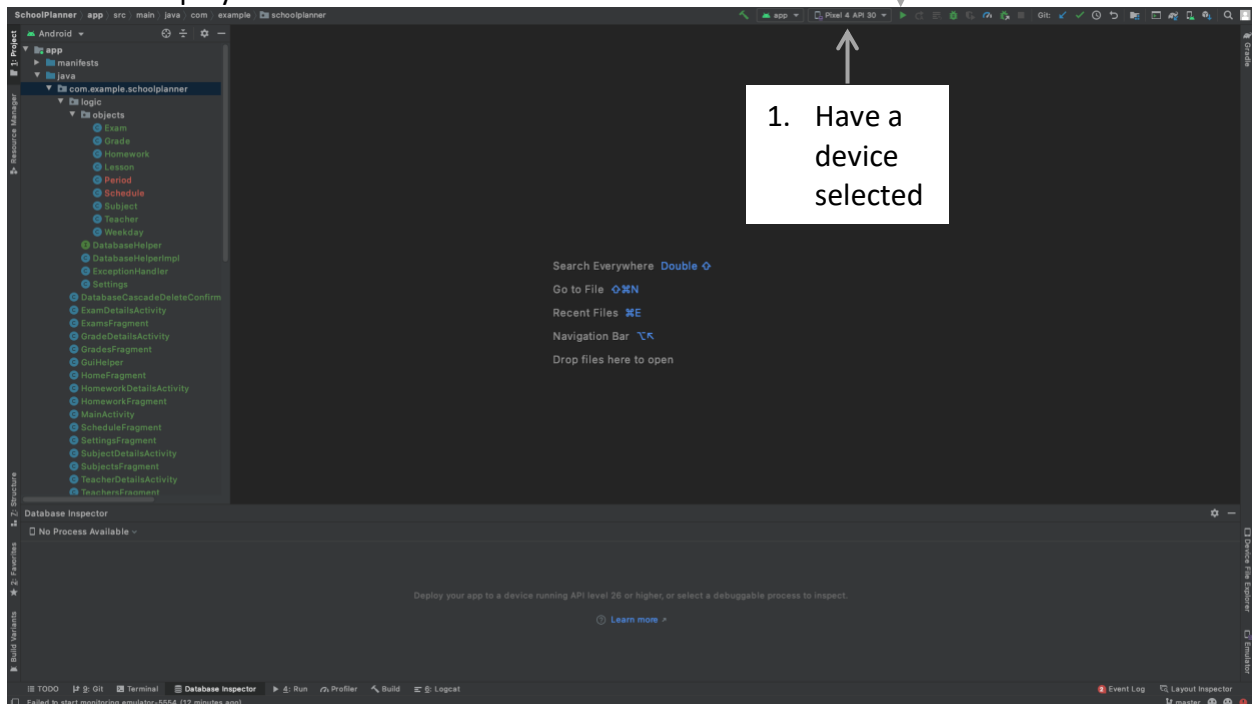

The goal of this app was to have those 3 functions in one app.

The alternative is using the three apps that I've mention or choosing this app. Using the alternative your information is all over the place while using my app, everything is in one place.

## How to Run

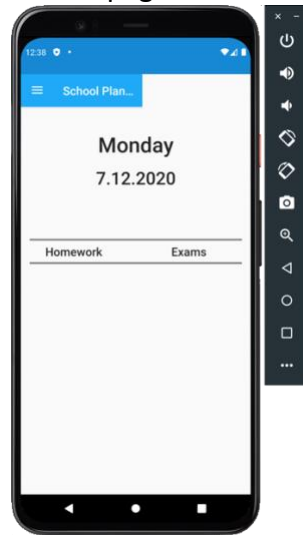

1. Have a device selected
2. Press play

2. Press play

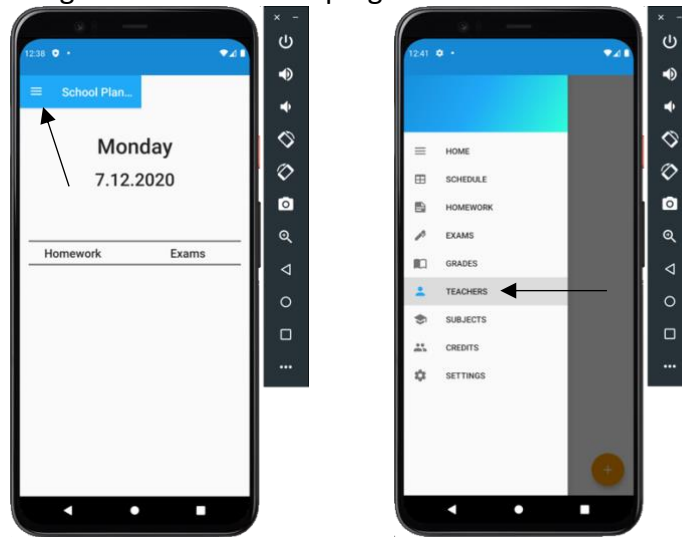

## How to use the software

When you launch it will first open the homepage:

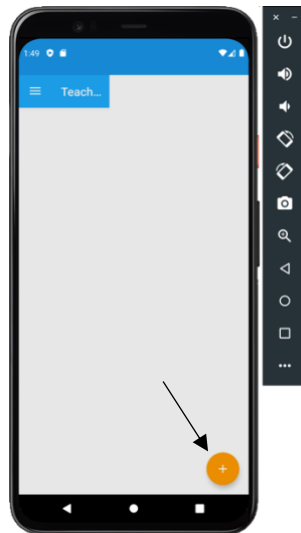

## Adding Subject

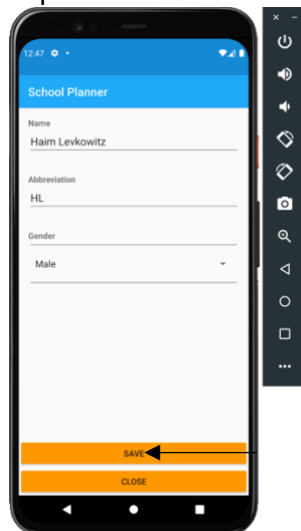

First, click on the Hamburger Button on the top right screen and click on the “TEACHERS” tab:
